

Solarstone

on-site solar solutions

TARVO KÄRGENBERG, HEAD OF SOLAR INFRASTRUCTURE & PPA

design, develop and produce solar hardware
products that act as a building skin

products → solutions → services

enable making solar a primary source of energy

turning energy to a multi-dimensional service

Leading building integrated solar roof solutions developer in the Nordics

7 years of history

750+ building integrated solar roofs installed

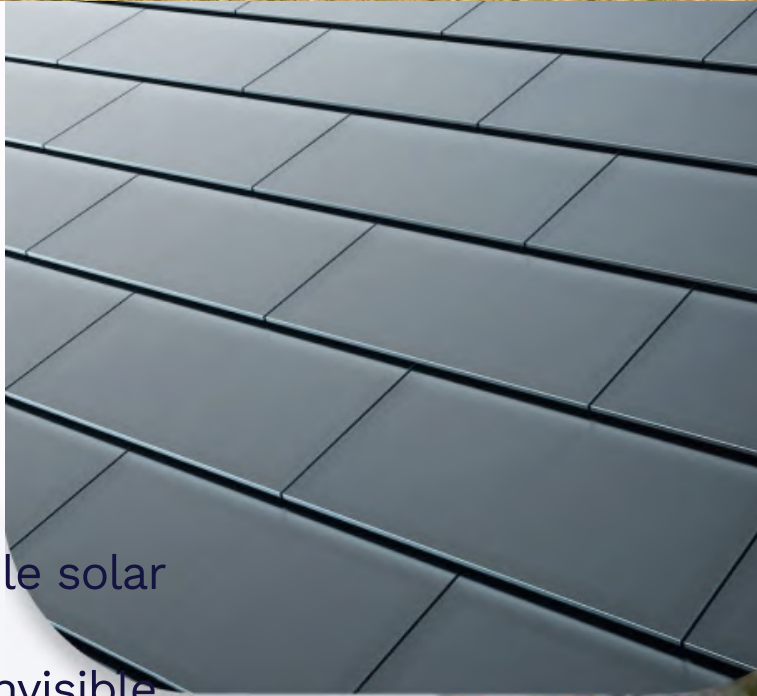

1 unique patented technology

SOLARSTONE

Standing seam compatible
solar modules for
aesthetically pleasing look

SOLARSTONE

Roof Tile-compatible solar
modules to build invisible
solar roofs

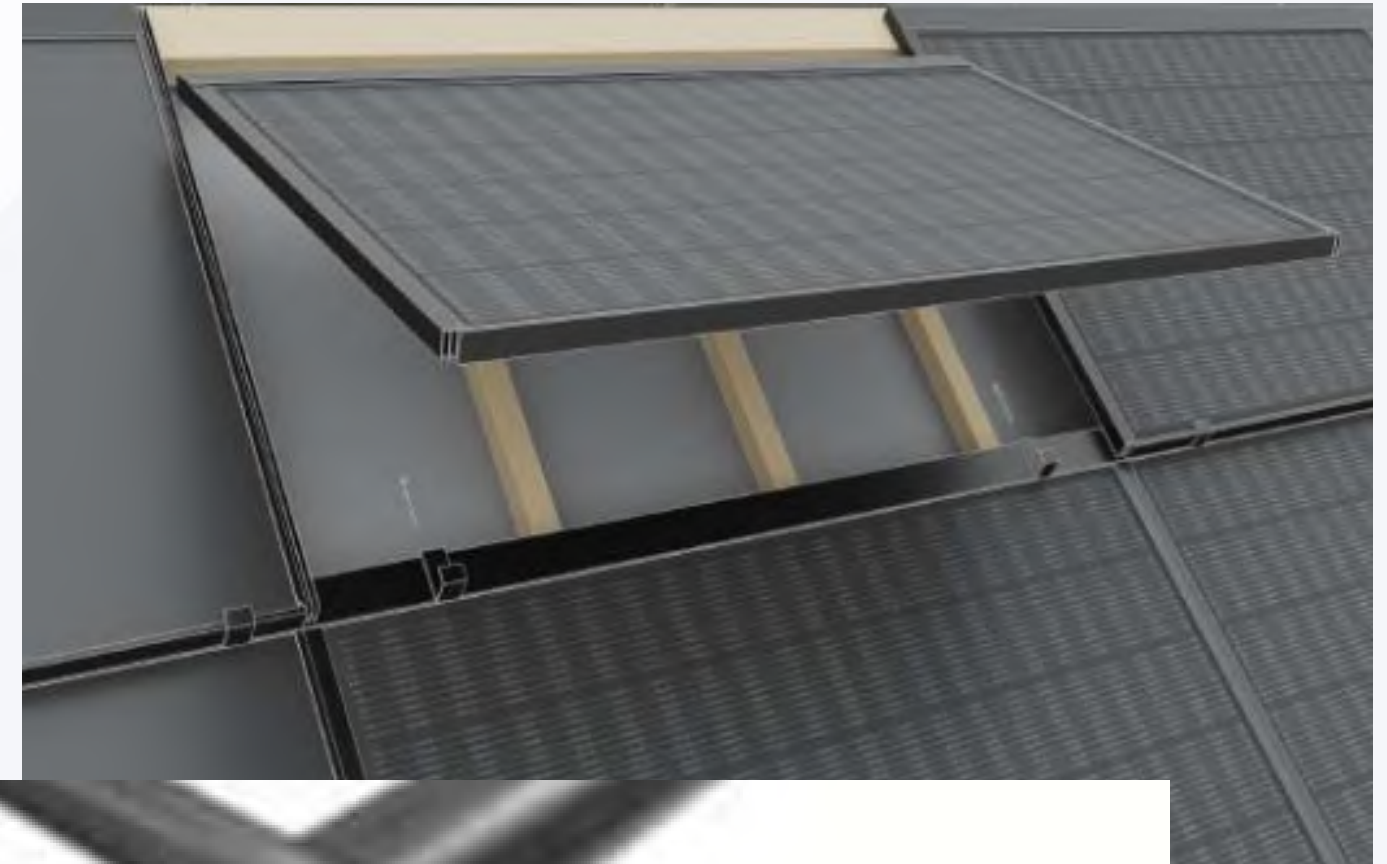

SOLARSTONE

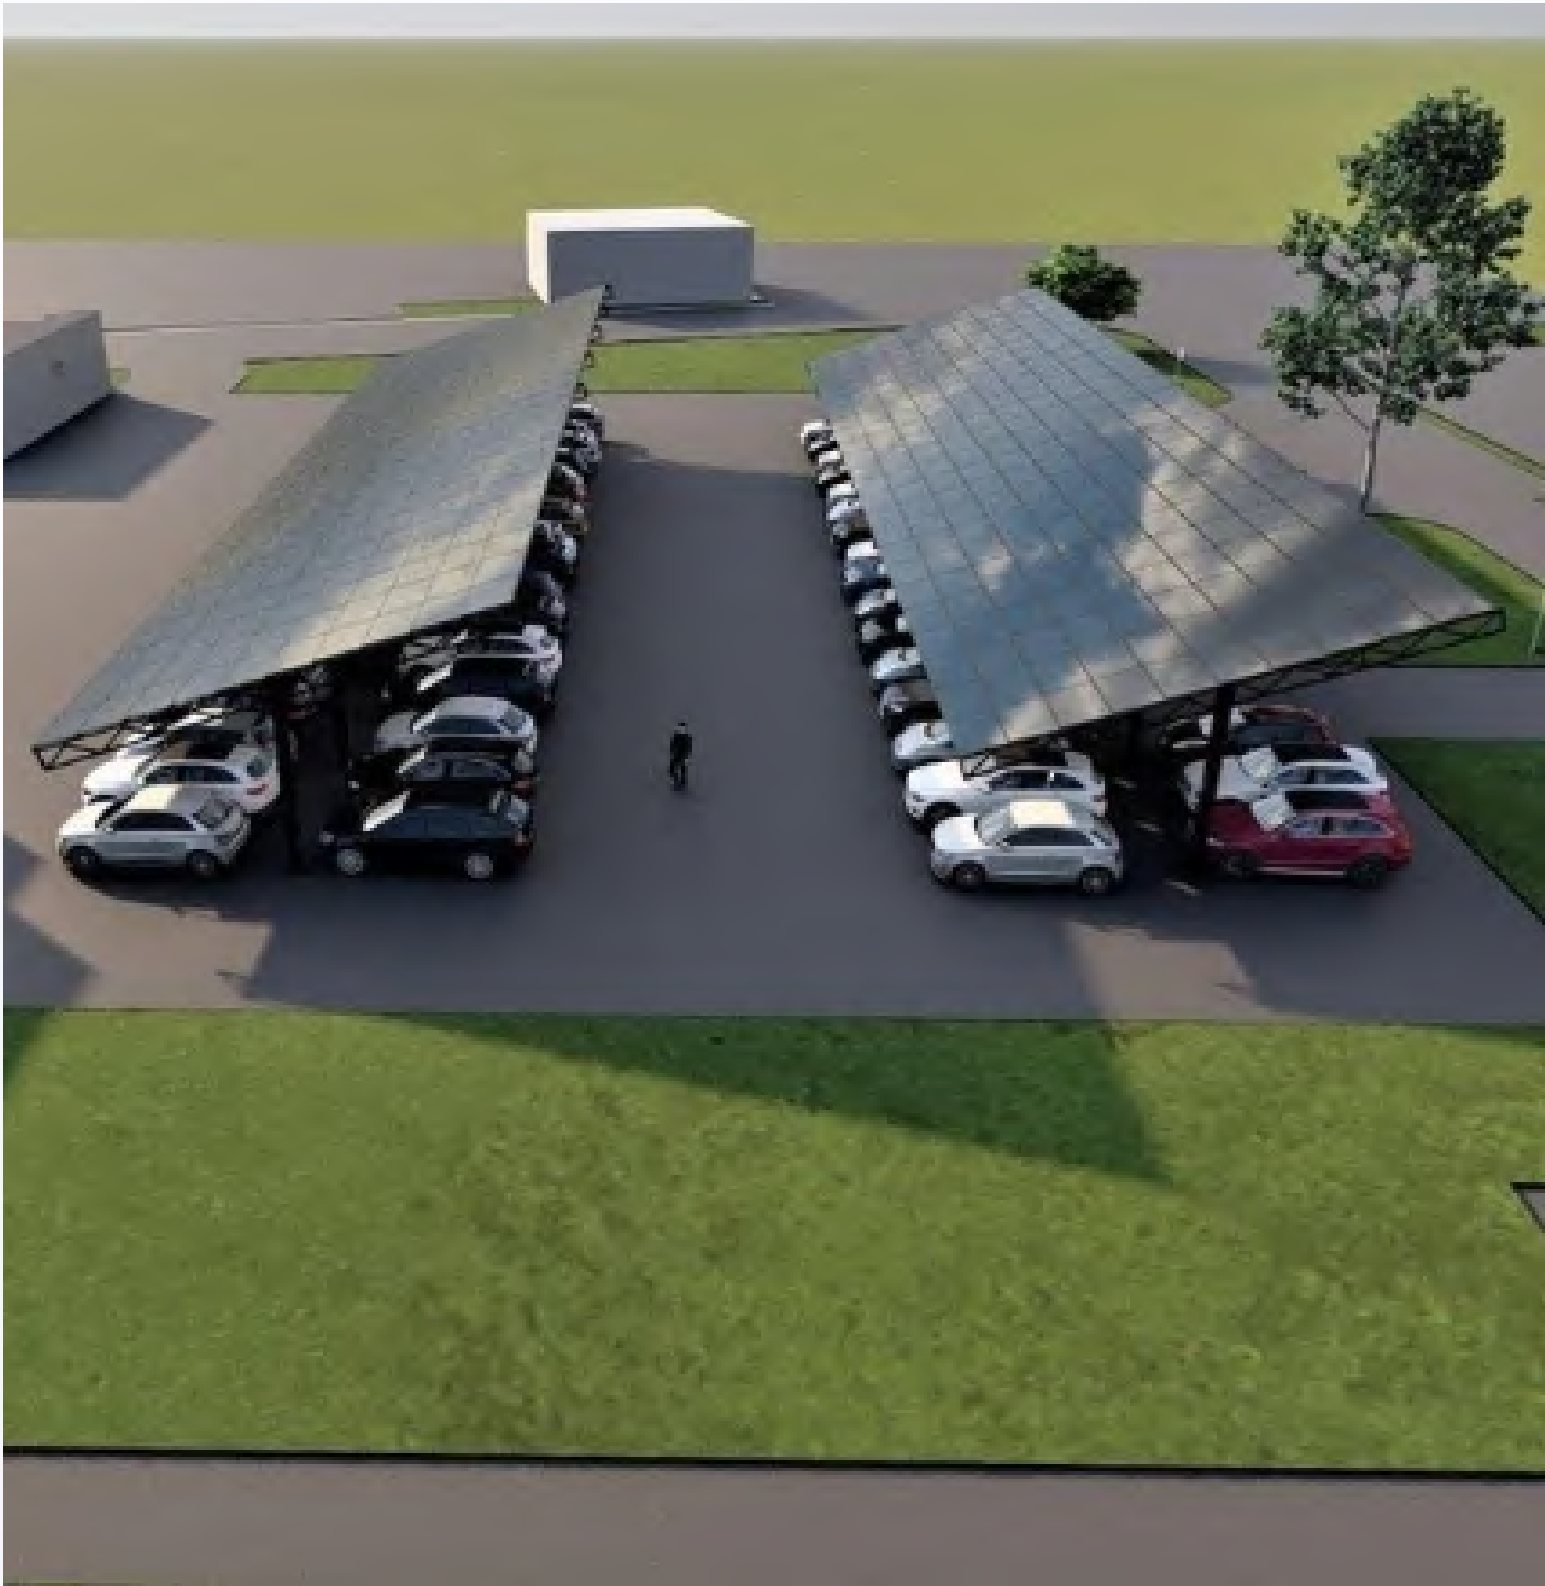

Regular solar panels turned into
solar roofing material, requiring
50% less construction materials

Solarstone patented Click-on framing kit

- turns any solar panel into BIPV
- 50% less resources than regular PV installation
- simple, quick and and intuitive installation
- the only BIPV solution with great economics and scalable for commercial projects

SOLARSTONE

Solar and hydrogen

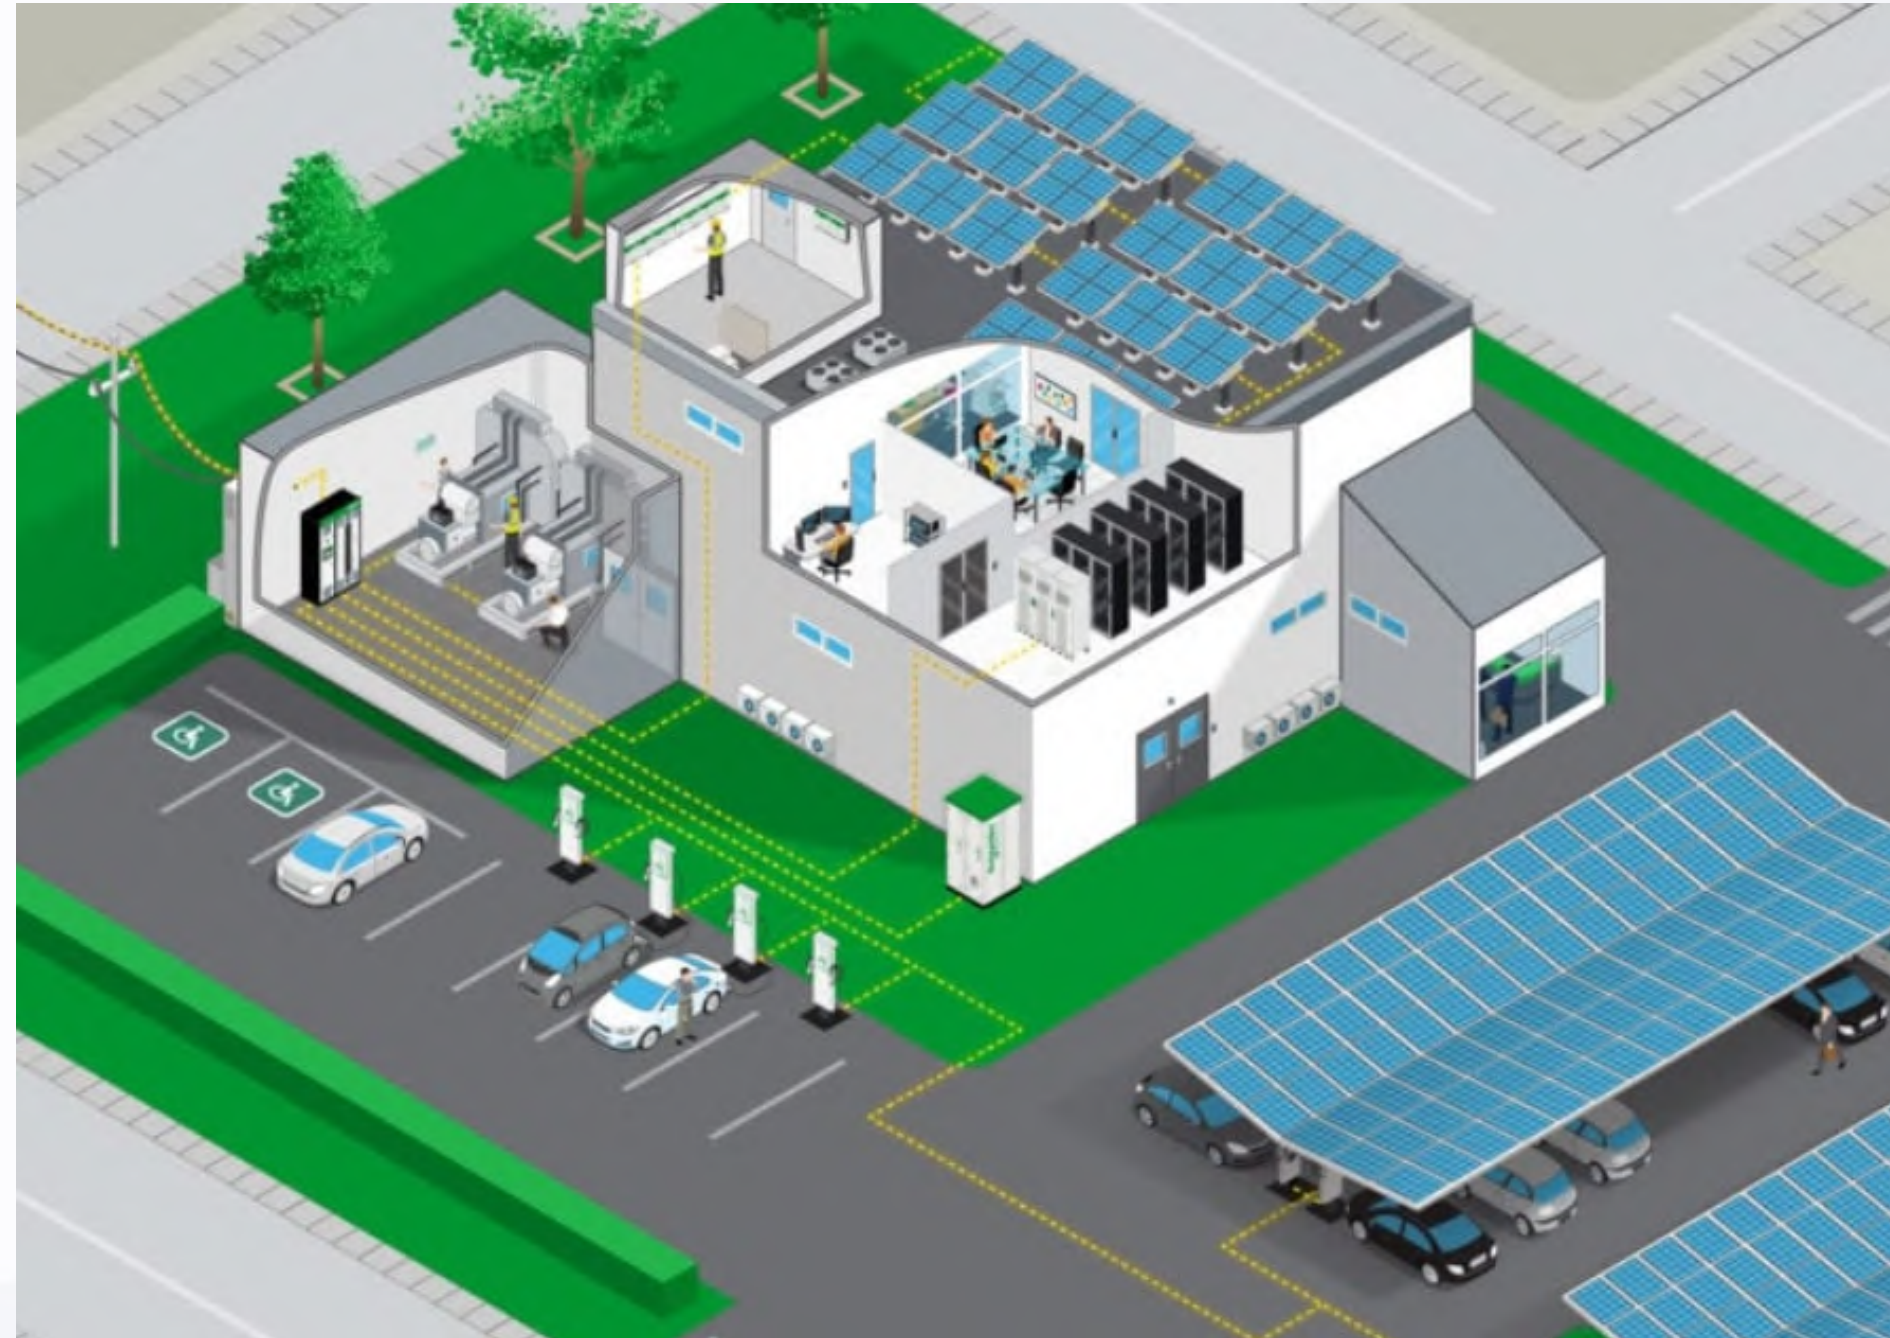

Energy as Infrastructure
